

Delivering the competitive edge through technology

Broadband - VPN - IP Telephony - Hosting - Co-location - Web Development - Application Development

“ We believe that any business should be able to take advantage of the benefits that technology brings.

However most businesses are often restrained due to lack of budget, lack of resource, or just not understanding what is available and how it could empower their business.

”

Delivering the competitive edge through technology

Node4 has developed a range of compelling solutions that can help any business to use technology to give them a distinct advantage over their competitors.

Node4 began by making a considerable investment in its core technology, ensuring operational readiness before launching its products. Node4 has now secured and continues to develop many high profile contracts with blue-chip organisations.

The business is privately owned and the directors are committed to building on the initial investment and success to make Node4 the technology partner of choice for small and medium sized organisations.

Our People

Delivering our unique range of solutions are our people. Our team is made up of individuals who have a wide range of business and technical knowledge and a joint aim of making the experience of dealing with Node4 second to none.

Premier
Certified
Partner

“ We are constantly developing a range of solutions that enable any organisation, regardless of size or budget, to increase productivity and profitability. ”

Business Class Broadband

Using our own business class network we provide ADSL, ADSL2+ and SDSL connections with different contentions, up to and including our uncontended premium service.

Quality of Service enabled broadband for multiple sites

If you want to run voice or other mission critical applications between sites then our IP-BVN solution offers a cost-effective alternative to MPLS based networks.

IP Telephony

Using our Cisco IP Telephony specialisation and technical experience we deliver on-site IP Telephony deployments.

HostTALK - Hosted IP Telephony

HostTALK is the name of our Hosted IP Telephony offering. Built using Cisco CallManager all the core components are located and managed in our data centre, giving the customer the ability to rent state of the art telephony on an affordable per extension per month basis.

Co-Location

Our co-location service allows you to install your own equipment in our data centre. With our tailor-made packages we can configure the exact environment that you need for your servers and applications.

SAN / Disaster Recovery

Using our network and advanced IP SAN technology we offer high availability, flexible storage solutions. We have the ability to take real-time or point-in-time snapshots of the environment which can be distributed over our multiple data centre's to provide a completely seamless disaster recovery / back solution.

Hosted Applications

We offer a range of hosted applications including Citrix, Microsoft Small Business Server and Microsoft Exchange.

Professional Services & Support

Our technical team are trained and accredited to the highest standard including Cisco CCIE and Microsoft MCSE. With a wide range of project experience we are able to offer our customers technical consultancy, installation services and support contracts.

“ How you connect to the internet is the core component which enables you to fully benefit from technology. Ensuring you have reliable connections to the internet and your other sites is therefore essential. ”

Businesses increasingly rely on technology, so it is critical that they work with a provider who can deliver services and solutions that are reliable and can enhance their business.

Node4 has made considerable investment in its core infrastructure to ensure it has the right platform to deliver essential services to any business or organisation.

Working with Node4 gives you the following:

- National broadband network
- State of the art data centre
- Tailor-made solutions
- Flexible approach
- Technical expertise
- Dedicated account management
- Commitment to high quality customer service.

Our Network

The Node4 network consists of Unbundled Telephone Exchanges (LLU), BT DataStream and IPStream services allowing us to deliver a range of connectivity options with high speeds and low contention ratios on a national basis. As an internet service provider we have connections to Telehouse - London and Telecity - Manchester ensuring our network has the highest levels of resiliency.

Our Data Centre

At the core of the Node4 network is our data centre. The Node4 data centre offers the latest technology in security and resiliency meaning that the services you want are available when you need them.

Features include:

- Network resiliency provided by fibre links
- 24/7 monitoring facilities
- UPS and power generators
- Fire detection system with gas suppression
- CCTV with recording
- Security controlled access system
- Customer build area.

A man with short dark hair, wearing a light yellow short-sleeved button-down shirt, is sitting in a green office chair. He is looking towards the camera with a neutral expression. The chair is positioned in front of a window with white horizontal blinds. The wall behind him is a solid brown color. The scene is brightly lit, likely from the window. The overall tone is professional and calm.

“ We understand our customers and believe in building long term business relationships with them. ”

Every day many people place their trust in Node4 to deliver their mission critical services. We understand our customers and believe in building long term business relationships with them.

The National Ice Centre

The National Ice Centre is the UK's premier venue for ice sports and entertainment. Situated in the heart of the prestigious Lace Market in Nottingham, the £43m venue was the first twin ice-pad facility in the country and is recognised as the centre of excellence for all ice sports in the UK.

John Charcol

With over 30 years of mortgage expertise, John Charcol is widely regarded as the UK's leading independent mortgage adviser

Interfleet Technology Ltd

Interfleet Technology is one of the world's leading international rail consultancies. Its Software Solutions team builds web-based information management services for rail clients such as Network Rail and the Rail Safety and Standards Board.

Key Personnel Group

Key Personnel Group is one of the East Midlands largest and most successful independent business solutions companies.

“ Like most businesses we rely heavily on the internet and since moving to Node4's SDSL service the reliability has been excellent. I would have no hesitation in recommending them to anyone. ”

IT & Retail Manager, National Ice Centre
Services: SDSL & Web Hosting

“ With one of the leading telephone based mortgage broking propositions, telephony is core to our business. By moving to HostTALK, we are able to benefit from a feature-rich platform that is managed with controlled costs allowing us to improve the service we offer to customers. ”

IT Manager, John Charcol
Services: HostTALK, Hosted IP Telephony

“ The services we offer the rail industry have high visibility and are used daily by many rail associated companies and users. Through Node4 we have found a partner who is able to deliver reliable and secure platforms to meet both ours and our client's needs. ”

Team Leader - Software Solutions,
Interfleet Technology Ltd
Services: Managed Hosting, SDSL

“ Before we came across Node4 we were connecting our six sites together using kilostream lines. Using Node4's IP-BVN solution means that we have not only reduced costs but have been able to improve connectivity and increase the bandwidth between all our sites. ”

IT Manager, Key Personnel
Services: IP-BVN (QoS WAN for Multiple sites)

“ Whatever your requirement, we can tailor-make a solution to meet your exact needs. Just talk to one of our qualified sales consultants. ”

Work with us

Node4 offers an innovative and unique range of products and services aimed solely at the business marketplace. This range of solutions is available to partners who share Node4's values of delivering the best technology with the best service and want to offer this to their own customers.
